Afternoon Jeffrey,

I am responding to your question posed to Laura Keller (ExxonMobil Chemical) about the sponsorship of CAS# 28473-21-4 (nonanol). Please accept this note as confirmation that ExxonMobil Chemical is sponsoring this substance in the HPV Chemical Program and will include it in the category summary report that will be prepared for the ALKYL ALCOHOLS C6 - C13 CATEGORY. Should you have any questions about the revised test plan, please feel free to ask me directly. I will be sure to include Laura Keller in any correspondence between us.

Regards,
Douglas

CAS# 28473-21-4

I assume this is the addition of nonanol to the plan. Can you take care of responding to Jeffrey?

Dear Laura Keller,

In regard to ExxonMobil's Alkyl Alcohols C6-C13 Category test plan that was submitted on March 9, 2004, one of the category chemicals (CAS# 28473-21-4) that was found in this revision was not found in the original test plan submission. CAS# 28473-21-4 is currently unsponsored by any company or consortium, and it is one of the chemicals on the 1990 HPV Challenge Program Chemical List that EPA hopes to have sponsored. Since it is a category chemical that should have all endpoints covered, would you like to simply reply in the affirmative to this email that you would like to receive recognition for sponsoring the chemical?

Thank you for your time and consideration. If you have any questions, please phone me at 202-564-8828.

Sincerely,
Jeffrey Taylor
